SYNTHETIC TEST DOCUMENT - NOT LEGALLY VALID

DESIGN AND ANALYSIS OF ALGORITHMS - LAB ASSIGNMENT REPORT

Fixture purpose: NEGATIVE TEST: upload this unrelated PDF into statutory-document categories to challenge false PASS decisions.

Document identification

Document Type	UNRELATED ACADEMIC LAB REPORT
Institution / Applicant	ABC Institute of Technology
Institution Reference	INST-1025
Location	Campus Demo Plot 12, Knowledge District, Greater Noida, Uttar Pradesh (fictional test address)
Course	Design and Analysis of Algorithms (DAA)
Laboratory Exercise	0/1 Knapsack dynamic programming
Practical Number	09
Submission Date	2026-10-21
Student Identifier	TEST-STUDENT-DAA-008
Teaching Department	Computer Science

Test specimen content

Lab exercise objective: implement 0/1 knapsack using dynamic programming in C. The task compares item profits and weights under a fixed capacity.

Method: construct a two-dimensional DP table, choose the maximum of selecting or skipping each item, and print the maximum obtainable profit. Complexity is O(number of items multiplied by capacity).

Sample input: weights 10, 20, 30; profits 60, 100, 120; capacity 50. Expected maximum profit: 220.

This is an academic algorithms assignment, NOT a trust deed, land document, approved building plan, occupancy certificate, fire safety certificate, structural stability certificate, affiliation NOC, or corpus fund proof.

Verification notice

This document is fictional data created exclusively to test automated upload, PDF parsing, text extraction, OCR, matching, officer review, and re-scrutiny. No government body, financial institution, regulator, university, architect, engineer, or fire authority issued or approved this document.

Authenticity and official statutory compliance must remain unverified and require appropriate human and external checks.
